

SCALING THE “SECOND PEAK”

Implementing a Hepatitis C Virus Pilot Program Targeting the Young, High-Risk Population

THE “FIRST PEAK”

population, also known as the Baby Boomer Generation, is the focus of current Hepatitis C Virus (HCV) detection and treatment.

A “SECOND PEAK”

population of younger, newly infected individuals was recently detected by surveillance.

Age distribution of newly reported confirmed cases of HCV
MA 2002 & 2009; MMWR 2011;60(17)537-541
