

## 2020 CSTE Annual Conference Abstract Submission Topics

<b>Chronic Disease/MCH/Oral Health</b>
CD- Program Evaluation and Performance Measures
CD- Risk or Protective Factors
CD- Surveillance Systems
CD/MCH- The Effect of Mental Health and Substance Use on Maternal and Child Health and Chronic Disease
CD/MCH/Oral- Clinical Data Use for Maternal and Child Health, Chronic Disease or Oral Health Reporting
CD/MCH/Oral- Population & Place (Novel GIS Analyses)
CD/MCH/Oral- Using Social Determinants of Health to Address Disparities
MCH- Birth Outcomes
MCH- Mortality and Morbidity
MCH- Program and Performance Evaluation
MCH-Surveillance Systems
Oral Health
<b>Cross Cutting</b>
Accreditation and Quality Improvement
Border and International Health
Communicating Epidemiology
Data Sharing
Epidemiologic Methods
Epidemiology Capacity and Workforce Development
Health Disparities
Local Epidemiology and Sub-County Estimation
Public Health and the Healthcare Interface
Public Health Collaborations
Public Health Emergency Preparedness and Response
Public Health Law, Ethics, and Policy
Tribal Epidemiology
<b>Environmental Health</b>
Air Quality & Respiratory Health
Children's Environmental Health
Climate & Health
Disaster Epidemiology
Environmental Health Investigations
Environmental Justice & Health Equity
Environmental Public Health Tracking
Water Quality, Waterborne Disease, & Harmful Algal Blooms
<b>Infectious Disease</b>
Antimicrobial Resistance
Emerging & Miscellaneous Infectious Diseases (including other mycotic/fungal disease, bacterial disease, and
Enteric Diseases
Healthcare-Associated Infections
Hepatitis
HIV & STD

## 2020 CSTE Annual Conference Abstract Submission Topics

Influenza & Other Respiratory Diseases (including TB)
Vaccine-Preventable Diseases
Vector-Borne & Zoonotic Diseases
<b>Injury</b>
Child Abuse and Neglect
Data Linkage to Improve Injury Surveillance and Prevention
Data/Surveillance Quality Improvement
Drug Overdose and Other Poisoning Epidemiology and Surveillance
Fall-Related Injuries
Health Disparities Related to Injury
Injuries from Motor Vehicle or Other Transportation Modes
Novel Application of Epidemiology Methods in Injury Surveillance and Prevention
The ICD-10-CM Transition for Applied Injury Epidemiologists
Translating Public Health Data into Practice and Policy
Traumatic Brain Injury
Violence and Suicide Epidemiology and Prevention
<b>Occupational Health</b>
Acute pesticide poisoning surveillance and intervention
Challenges and new methods in occupational health surveillance
Disparities and special populations in occupational health
Emerging issues in occupational safety and health
General issues in occupational health morbidity and mortality surveillance
Industry -specific topics in occupational health (e.g., Construction industry)
Innovative ways to showcase occupational health data, intervention findings, or prevention messages (e.g.,
Integrating occupational health and safety into public health practice
Lead exposure surveillance and intervention
Novel topics in occupational safety and health
Occupational health and informatics(e.g., I/O variables and work information in surveillance systems, EHRs,
Occupational Health Indicators
Occupational Health Surveillance
Occupational lung disease surveillance and intervention
Occupation-specific topics in occupational health (e.g., health care workers, first-responders)
Partnerships and outreach to promote worker health and safety
Using data to promote workplace solutions
Using worker safety and health data in existing surveys (e.g., BRFSS, NHIS, PRAMS, and ACS)
Using workers' compensation data for surveillance and intervention
<b>Substance Use</b>
Alcohol Misuse
Application of Epidemiology Methods in Substance Use/Mental Health
Behavioral Health and Behavioral Health Policy
Drug Misuse
Drug Overdose
Health Disparities- Substance Misuse and/or Mental Illness

## 2020 CSTE Annual Conference Abstract Submission Topics

Marijuana Use and Misuse
Mental Health
Prescription Drug Monitoring Program
Public Health Surveillance for Substance Misuse and/or Mental Illness
Substance Use and Mental Health Epidemiology Capacity
<b>Surveillance/Informatics</b>
Antimicrobial resistance surveillance
Data standardization and harmonization
Disease-specific surveillance and informatics applications
Electronic case reporting
Electronic disease surveillance systems (e.g., EDSS, NEDSS, etc.)
Electronic laboratory reporting
Informatics infrastructure in state and local health departments
Interdisciplinary approaches to surveillance and informatics
Leveraging external infrastructure to improve public health surveillance (e.g., EHRs, HIEs).
Novel and emerging surveillance methods, analytics, and data management
Other surveillance and informatics
Surveillance policy and/or governance
Surveillance strategies for the detection and management of outbreaks/clusters
Surveillance system integration efforts
Syndromic surveillance
