2022 CSTE Annual Conference Abstract Submission Topics

Chronic Disease/MCH/Oral Health
CD- Program Evaluation and Performance Measures
CD- Risk or Protective Factors
CD- Surveillance Systems
CD/MCH- The Effect of Mental Health and Substance Use on Maternal and Child Health and Chronic Disease
CD/MCH/Oral – Addressing Epidemiology Workforce Capacity
CD/MCH/Oral – Intersection with Emergency Preparedness and Response
CD/MCH/Oral- Clinical Data Use for Maternal and Child Health, Chronic Disease or Oral Health Reporting
CD/MCH/Oral- Population & Place (Novel GIS Analyses)
CD/MCH/Oral- Using Social Determinants of Health to Address Disparities
MCH- Birth Outcomes
MCH- Mortality and Morbidity
MCH- Program and Performance Evaluation
MCH-Surveillance Systems
Oral Health

Cross Cutting
Accreditation and Quality Improvement
Border and International Health
Communicating Epidemiology
Data Sharing
Epidemiologic Methods
Epidemiology Capacity and Workforce Development
Health Equity
Local Epidemiology and Sub-County Estimation
Public Health and the Healthcare Interface
Public Health Collaborations
Public Health Emergency Preparedness and Response
Public Health Law, Ethics, and Policy
Tribal Epidemiology

Environmental Health
Air Quality & Respiratory Health
Children's Environmental Health
Climate & Health
Disaster Epidemiology
Environmental Health Investigations
Environmental Justice & Health Equity
Environmental Public Health Tracking
Water Quality, Waterborne Disease, & Harmful Algal Blooms

2022 CSTE Annual Conference Abstract Submission Topics

Infectious Disease
Advanced Molecular Detection (i.e., whole genome sequencing, genomic epidemiology, data management, etc.)
Antimicrobial Resistance
Emerging & Miscellaneous Infectious Diseases (including Legionnaires' Disease, other mycotic/fungal disease, bacterial disease, and AFM)
Enteric Disease
Healthcare-Associated Infections
Hepatitis
HIV & STD
Influenza & Other Respiratory Disease (including COVID-19 and TB)
Vaccine-Preventable Diseases
Vector-Borne & Zoonotic Diseases

Injury
Child Abuse and Neglect
Data Linkage to Improve Injury Surveillance and Prevention
Data/Surveillance Quality Improvement
Drug Overdose and Other Poisoning Epidemiology and Surveillance
E-cigarette or Vaping Associated Lung Injury (EVALI)
Fall-Related Injuries
Health Disparities Related to Injury
Injuries from Motor Vehicle or Other Transportation Modes
Injury Epidemiology in the ICD-10-CM Era
Injury Trends and COVID-19
Novel Application of Epidemiology Methods in Injury Surveillance and Prevention
Translating Public Health Data into Practice and Policy
Traumatic Brain Injury
Violence and Suicide Epidemiology and Prevention

Occupational Health
Acute pesticide poisoning surveillance and intervention
Challenges and new methods in occupational health surveillance
Disparities and special populations in occupational health
Emerging issues in occupational safety and health
General issues in occupational health morbidity and mortality surveillance
Industry-specific topics in occupational health (e.g., Construction industry)
Innovative ways to showcase occupational health data, intervention findings, or prevention messages (e.g., digital stories, social media, infographics)
Integrating occupational health and safety into public health practice
Lead exposure surveillance and intervention
Novel topics in occupational safety and health
Occupation-specific topics in occupational health (e.g., health care workers, first-responders)
Occupational health and informatics (e.g., I/O variables and work information in surveillance systems, EHRs, electronic case reporting, health alert network)

2022 CSTE Annual Conference Abstract Submission Topics

Occupational Health Indicators
Occupational Health Surveillance
Occupational lung disease surveillance and intervention
Partnerships and outreach to promote worker health and safety
Using data to promote workplace solutions
Using worker safety and health data in existing surveys (e.g., BRFSS, NHIS, PRAMS, and ACS)
Using workers' compensation data for surveillance and intervention
Work-related issues and COVID
Substance Use
Alcohol Misuse
Application of Epidemiology Methods in Substance Use and Mental Health
Behavioral Health and Behavioral Health Policy
Cannabis Use and Misuse
Drug Misuse
Drug Overdose
Health Disparities- Substance Misuse and/or Mental Illness
Mental Health
Prescription Drug Monitoring Program
Public Health Surveillance for Substance Use and Mental Illness
Substance Use and Mental Health Epidemiology Capacity
Surveillance/Informatics
Contact tracing and exposure notification
Data modernization efforts
Data visualization tools, dashboards, and applications
Electronic case reporting
Electronic laboratory reporting
Evaluating electronic disease surveillance systems
Informatics infrastructure, capacity, and work flow at state and local health departments
Interdisciplinary approaches to surveillance/informatics
Interoperability and linkages across public health surveillance systems and other information systems & infrastructure (e.g., vaccine registries, HIEs, EHRs)
National Notifiable Disease Surveillance System (NNDSS)
Novel informatics solutions or scaling/re-using existing systems for data collection, management, and analysis to meet expanding data needs
Other surveillance and informatics
Processes and tools to improve data quality, completeness, and standardization
Surveillance policy, governance, and/or standards for health IT
Surveillance strategies for the detection and management of outbreaks/clusters
Syndromic surveillance
Utilizing vital records data for public health surveillance
